PREFACE

The following explanations apply throughout the publication:

Subject-matter workers in extension are generally shown under the respective department or division of the college.

Certain institutions use the academic title for experiment station workers as well as for personnel engaged solely as teachers.

Published since 1889.

REPORT OF THE OFFICE OF EXHIBITS

REPORT OF THE OFFICE OF EXHIBITS.

UNITED STATES DEPARTMENT OF AGRICULTURE,
OFFICE OF EXHIBITS,
Washington, D. C., September 12, 1922.

SIR: I submit herewith the report of the work of the Office of Exhibits for the fiscal year ended June 30, 1922.

Respectfully,

JOSEPH W. HISCOX,
In Charge of Exhibits.

Hon. HENRY C. WALLACE,
Secretary of Agriculture.

[illegible] fiscal year 1922 the exhibit work wa[illegible]
During the [illegible] the officer in charge [illegible] s transferred to the office of the Secre[illegible] exhibits reporting directly to the Assistant Secretary of Agriculture. This change became effective November 16, 1921.

Department exhibits were shown during the year at 60 fairs and expositions held in 39 States and in the District of Columbia, with a total attendance of over 4,000,000. Approximately 121,900 square feet of floor space were used for exhibit purposes. Sixteen applications for exhibits were refused on account of lack of sufficient material, and in one or two instances because of conflicting dates.

Exhibits were routed on circuits where possible, and 31 department representatives from the following bureaus accompanied them and conducted their presentation and display: Bureau of Agricultural Economics, Bureau of Soils, Bureau of Public Roads, Bureau of Animal Industry, Forest Service, States Relations Service, Bureau of Biological Survey, and Weather Bureau.

Following is a list of the cities at which exhibits were made:

Exhibits for the State fairs were selected and prepared with a view to furnishing helpful information on agriculture to the people of the localities in which the exhibits were shown. Models, objects, charts, maps, pictures, and demonstrations were the principal mediums used in presenting the information. On the central and southeastern

circuits market reports were received over radio receiving sets, installed as a part of the exhibit. This was one of the special features at the International Livestock Exposition, and numerous requests were made on the department's representatives for copies of this free daily service.

At the western district fairs exhibits were presented on the activities of the Forest Service, Biological Survey, Bureau of Public Roads, Bureau of Animal Industry, and Bureau of Agricultural Economics. These exhibits were conducted by western representatives of the three bureaus first named. Subjects from all the major bureaus were presented in the general agricultural exhibits. Representatives from various bureaus were detailed from Washington to conduct these exhibits. Comment from press and public was enthusiastically appreciative.

EXHIBIT AT THE NATIONAL DAIRY SHOW.

Exhibits were prepared in booth form for the National Dairy Show. Composite pictorial, graphic, and word presentations were made on the walls of 23 of these booths of the various phases of dairy-cattle breeding, handling, and foreign marketing. The States Relations Service gave demonstrations of judging by the boys' and girls' clubs on a herd of live animals which the Bureau of Animal Industry furnished for the exhibit. The type of exhibit and method of presentation proved exceptionally successful, and requests have been received for its use at several places during the next fair season. The consensus of opinion was expressed in a letter by the secretary of a prominent association when he wrote: "That is a good way to put publicity into the hands of the people who will benefit most by it."

The most extensive of the special exhibits were shown at the National Dairy Show, at Hamline, Minn., and the International Livestock Exposition, at Chicago, Ill.

Previous to its display at the National Dairy Show a portion of this dairy exhibit was shown at the Dairy Cattle Congress at Waterloo, Iowa. Afterwards it went in whole or in part to the Pacific International Livestock Exposition at Portland, Oreg., the California Dairy Council at Stockton, Calif., the Wisconsin Dairy Show at Madison, Wis., and the Michigan Dairy Show at Saginaw, Mich.

Some of the booths prepared for the National Dairy Show, and particularly those on the use of milk, were later loaned for use in milk campaigns at Richmond, Va., Chattanooga, Tenn., Oshkosh, Wis., Columbus, Ohio, New Orleans, La., and Oklahoma City, Okla.

INTERNATIONAL HAY AND GRAIN SHOW.

Eleven splendid booths similar in style to those prepared for the National Dairy Show, presenting livestock information from the Bureaus of Animal Industry, Agricultural Economics, Chemistry, Soils, Forest Service, and the States Relations Service were prepared for the International Hay and Grain Show in Chicago. A few models were also used. Many letters of commendation have been received from the presidents of agricultural colleges and prominent farmers and stockmen throughout the United States; also much favorable comment has appeared in the agricultural press.

At the Eastern States Exposition at Springfield, Mass., the department's exhibit featured boys' and girls' club activities of the States Relations Service, and 10 head of horses from the United States Morgan horse farm, Middlebury, Vt., were exhibited for the purpose of showing to the New England farmers the progress being made in the department's horse-breeding work.

In addition to the foregoing, exhibits on practically all subjects relating to agriculture were prepared or made available from exhibits on hand and sent to numerous points throughout the United States.

A radical departure has been made in the style of the presentation of information in exhibit form. So far as practicable single exhibits are confined in scope to single outstanding broad subjects, and the favor with which this method of presentation has been received, indicates that the course adopted is along progressive lines.

The department has developed a harmonious, attractive, forceful, and practical standard type of exhibits showing clearly and in concrete form the results of its investigational work. As a result educational institutions, agricultural associations, and kindred organizations are increasingly willing to share in the cost of [illegible] presenting these exhibits to the public.

BRAZILIAN INTERNATIONAL CENTENNIAL EXPOSITION.

The department's exhibit material prepared for the Brazilian International Centennial Exposition to be held in Rio de Janeiro, Brazil, September 7, 1922, to March 31, 1923, was finished and shipped on July 25, 1922. Six of the important bureaus of the department (Bureau of Public Roads, Bureau of Animal Industry, Weather Bureau, Forest Service, States Relations Service, and Bureau of Plant Industry) participated in the exhibits prepared under direction of this office. A carload and a half of material, designed to cover 4,000 square feet of floor space, was shipped south. The exhibit represents a careful selection of subjects with an eye to including only those relating to American farming which are of most interest to Brazilians. Large composite paintings, models, maps, illustrations, graphs, and specimens were used to show road construction in the United States, the livestock, naval-stores, and navel-orange industries, the gathering and distribution of weather information, educational facilities in agriculture and forestry, and our forestry resources.

The following reports were written and translated into Portuguese, and were printed for distribution at the exposition:

Forests and Forestry in the United States.
Livestock Industry of the United States.
The United States Forest Service.
The United States Weather Bureau.
The Study of Forestry.
Forest Products Laboratory.
The Bureau of Public Roads and its Exhibit.
Education and Research in Agriculture and Home Economics in the United States.

Twenty-one motion pictures on agricultural subjects were prepared by the department, to be shown daily in three auditoriums on the exposition grounds.
